Kilobytes are mostly used to measure the size of small files. For example, a simple text document may contain 10 KB of data and therefore it would have a file size of 10 kilobytes. Graphics of small websites are often between 5 KB and 100 KB in size. Individual files typically take up a minimum of four kilobytes of disk space. Mega Byte

Understanding file sizes | Bytes, KB, MB, GB, TB, PB, EB ...

The file data structure is primarily used for managing large amounts of data which is not in the primary storage of the system. The files help us to process, manage, access and retrieve or basically work with such data, easily. 3. Lists. The lists support dynamic memory allocation. The memory space allocated, can be changed at run time also.

Types of Data Structures - The Crazy Programmer

Data structures are being used in almost every program or software system that has been developed. Moreover, data structures come under the fundamentals of Computer Science and Software Engineering.
