Alternative Energy Demystified by Stan Gibilisco ...

Alternative Energy Demystified could perhaps better have been titled Energy Demystified as it covers all methods of heating, propulsion, and electricity generation. Designed as a self-study manual with end of chapter open book quizzes, and a closed book final exam, the concise, objective entries of an incredible range of technologies, and comprehensive index also lends itself to use as a reference work.

Alternative Energy Demystified book by Stan Gibilisco

Renewable energy sources are forms of potential energy that constantly and rapidly renew themselves for steady, reliable use. Solar and wind power are examples of renewable energy (Fig. 1). Any form of potential energy that does not fall within the definition accepted for renewable energy is considered nonrenewable.
