England comprises most of the central and southern two-thirds of the island of Great Britain, in addition to a number of small islands of which the largest is the Isle of Wight. England is bordered to the north by Scotland and to the west by Wales.

### **Geography of England Facts for Kids**

Physical and human geography The landscape The city site. Manchester occupies a featureless plain made up of river gravels and the glacially transported debris known as drift. It lies at a height of 133 feet (40 metres) above sea level, enclosed by the slopes of the Pennine range on the east and the upland spur of Rossendale on the north. Much of the plain is underlain by coal measures; mining was once widespread but had ceased by the end of the 20th century.
