At the core of the 4011 function generator is a dedicated MM038CPP high frequency waveform generator chip (see picture above), which pretty much defines the capability of BK 4011. MM038 is capable of running at up to 20MHz, so presumably BK4011 can be hacked to run at much higher than rated 5MHz maximum frequencies (the frequency range of the output amplifier might be a limiting factor) with out too much efforts.
