The difference between a journey map and a service blueprint

A blueprint helps understand the totality of a service as a process. It provides a graphical depiction of the services. The service system blueprint simplifies service complexities by displaying the operation of an existing system. The benefits of service blueprinting can be explained as follows.

Benefits or Uses of Service Blueprint

Business process modeling (BPM) in business process management and systems engineering is the activity of representing processes of an enterprise, so that the current process may be analyzed, improved, and automated. BPM is typically performed by business analysts, who provide expertise in the modeling discipline; by subject matter experts, who have specialized knowledge of the processes being ...
