In calculus, the quotient rule is a method of finding the derivative of a function that is the ratio of two differentiable functions. Let $f(x) = g(x)/h(x)$, where both g and h are differentiable and $h(x) \neq 0$. The quotient rule states that the derivative of $f(x)$ is $f'(x) = (g'(x)h(x) - g(x)h'(x)) / [h(x)]^2$. Integral. E.
