Imagine our weather if Earth were completely motionless, had a flat dry landscape and an untitled axis. This of course is not the case; if it were, the weather would be very different. The local weather that impacts our daily lives results from large global patterns in the atmosphere caused by the interactions of solar radiation, Earth's large ...

### Weather systems & patterns | National Oceanic and ...

Chapter 16: Weather and Climate. Weather is considered to be the atmospheric conditions that are happening now or within a few days. On the other hand, climate represents the long term atmospheric patterns within which weather occurs. As the popular saying goes, "Climate is what you expect, and weather is what you get!"

### Chapter 15 weather and climate | Geography | Foundation ...

When you were a child, the phrase "it's raining cats and dogs out there" might have been the only aspect of weather that interested you. Fluffy cats and dogs falling from the sky? Amazing! In this quiz, we're going to take a more grown-up approach to the topic of weather and climate, however, as we see how much you know about the basics from a fifth-grade level! Good luck!
