Dr. Blaylock concurs with Dr. Isaacson — to keep your brain sharp, avoid HFCS and the foods that contain it. Other foods that Dr. Blaylock has found contribute to cognitive decline include nitrates, nitrites, glutamate additives (especially MSG), soy products, trans fats, and processed white breads.

Could These 8 Superfoods End Alzheimer's?

Dr. Blaylock: Well, glutamine is an amino acid that's converted to glutamate. In your brain, in order to make glutamate, your body has glutamine that is converted in your brain cells into the glutamate neurotransmitter. If you feed an animal a lot of glutamine, you will produce excitotoxicity in the brain.

If You Want to Protect Your Brain, Avoid These Common Food ...

Sugar — especially high fructose corn syrup — enhances inflammation and should be avoided. Wheat and whole grain breads are high in glutamine/glutamate and should not be eaten in excess. These breads are also high in gluten, which has been connected to chronic pain syndromes, especially migraines and fibromyalgia.44
