DSO Shell kits has all SMD parts on the analog board pre-soldered and leaves through-hole parts for user to install. DSO Shell runs on a 9V (do not use power voltage higher than 10V!) power supply. Users need to prepare their own power supply as it is not included in the kits. The power jack on the mainboard accepts standard 5.5mm/2.1mm DC plug.

DSO Shell DIY Kit - Seeed Studio

Seeed Studios DSO Shell DIY Kit is for the 0-200KHz bandwidth DSO oscilloscope that includes a display and MCU mounted on the same board (mainboard). This allows for developers to avoid using inter-board pin-headers or soldering on the pin-headers that can often be problematic for beginners. The analog channel is placed on a separated board which contains most of the components that need to be soldered on.
