Environmental Law and Policy (2504): (Formerly Law 603) This introductory course will focus on the variety of legal mechanisms we use to address environmental harms such as air and water pollution, global climate change, and habitat destruction.

Environmental Law and Policy - Stanford Law School

Environmental law, or sometimes known as environmental and natural resources law, is a term used to explain regulations, statutes, local, national and international legislation, and treaties designed to protect the environment from damage and to explain the legal consequences of such damage towards governments or private entities or individuals (1). As we will explain in the next section, it covers many areas, all with the same purpose already described here.
