Grade 5 Level Respiratory System

Grade: Five. Topic: Human Organ Systems Forces Acting on Structures and Mechanisms. Introduction/Context: This is an open-ended project where students design and make a stable structure that will support a working, model respiratory system. The activity begins with an analysis of structures and an investigation of existing design problems (e.g., weak, collapsing legs, poor construction) and a discussion about how the use of models and simulations, help people to learn the systems such as the ...
