If you observe the insect flying, you know it is a winged insect and can eliminate at least four insect orders (the wingless insects) from your guesses.

Some insects, like

Lawn Insects And Management

Insects can be found almost everywhere on the Earth. They live in the ground, on top of the ground, in the air, under logs and rock, inside and outside of plants, flowers, and trees, and even on other animals! Did you know that some bugs can even survive in the extremely cold temperatures of Antarctica?
