Micro Engineering
lancemindheim.com My product of choice when it comes to turnouts are those from Micro Engineering. They are mechanically sound, highly detailed, and the points are spring loaded allowing them to be thrown with a simple flip of the finger. As solid as they are, there are a few enhancements that make a good part even better.

Micro Engineering Company - TrainWorld
I have bought some Micro Engineering "DCC friendly" turnouts. "The metal frog can be powered", the closure rails get power "via built-in jumpers from their adjacent stock rails" The instruction says: "Switch rails (points): Power is already supplied to the two Switch rails via the built in hinge rail joiners at the closure rail/switch rail ...

MicroEngineering DCC friendly turnouts power to points ...
I don't get why Micro Engineering doesn't making turnouts in code 55; they make the flextrack in weathered and non-weathered, so i would think they would make turnouts as well. I need a couple of them... and if theres an easy brand to get going, then I'm going to need a few more.

code 55 HO turnouts/Railway Engineering experiece anyone ...
Micro Engineering is cheaper (27.68 for 6 3-foot sections) than Shinohara (7.05 for each 39 inch section) but Shinohara does have the 3 extra inches per section, and the minimum number you can order is 5.

Shinohara hextrack vs. Micro Engineering - Model ...
The last two Micro-Trains cars I bought have these, and they look and run great on Atlas code 55 track. But enough about wheels for now. The bigger problem. I also discovered that my locomotives were derailing on the Atlas code 55 turnouts, and all the filing and tweaking I did on the points, frogs, and rail joints didn't help.

Adventures in code 55 track | ModelRailroader.com
The yard ladder is made up of Walthers #5 turnouts since only freight cars and switchers will be traversing it. No steamers, six axle locos, or passenger cars will be in there so the #5s will do the job and gives me a more compact yard. The rest of the turnouts are all Micro Engineering #6 code 83 and they are DCC friendly right out of the package.

Micro Engineering Turnouts | DCC Guy
• The #5e Intermediate Ladder turnout is one of five different #5 turnouts of the Micro Engineer- ing Ladder Track System. For more information go to microengineering.com. • Turnouts have a sprung switch rail assembly. • Turnouts are DCC compatible. Cut out templates on lines[]

Micro Engineering Products - ModelTrainStuff
Micro Engineering Turnout Frog Wire. Jim Exler, Nampa, ID June 5, 2019 . Connecting a wire to the ME cast frog can be a challenge. This is my idea and it seems to work. 1. First I drilled a 0.9 mm hole down through the frog at its narrowest point. I want easy access and the least amount of metal in the frog that I have to heat for the solder joint.
