**PROBLEM ASSOCIATED WITH SMALL SCALE POULTRY FARMS**  
Most small poultry houses do very well with one light above the feeding and watering area. A bird only needs one foot candle of light to sustain year round egg production. Windows placed on the south side of the coop will also be a good source of light and warmth in winter and a good source of ventilation in summer.

**Small Scale Poultry Housing - Penn State Extension**  
If there are enough producers, they can form a co-operative and may be able to establish a small poultry hatchery (see section 14). This will help to make chicken meat production sustainable. A depot can be set up to purchase and store large amounts of feed to sell to the poultry keepers at a cheaper price.
