HIPPS Codes

Health Insurance Prospective Payment System rate codes, known as HIPPS codes, represent specific sets of patient characteristics (or case-mix groups) on which payment determinations are made under several prospective payment systems (PPS). These HIPPS codes are reported on claims to insurers. Under Resource Utilization Group (RUG-IV PPS, the HIPPS codes that are on the claim form have become second nature to those who deal with the Minimum Data set (MDS) and billing for Medicare Part A.

Understanding PDPM and HIPPS Coding

The HIPPS code must be entered on each claim, and must accurately reflect which assessment is being used to bill the RUG-III group for Medicare reimbursement. The CMS HIPPS codes contain a three position code to represent the RUG-III of the SNF resident, plus a 2-position assessment indicator to indicate which assessment was HIPPS modifier codes have been established for each type of assessment used to support Medicare payment.
